Policy 2025-03 PSR Request Policy

It is the policy of the State Board of Elections to administer and maintain voter registration records accurately and transparently. In doing so, the State Board must balance the requirements for public disclosure of registration records imposed by laws like Election Law § 3-505 against voters' privacy interest in the personally identifying information they provide for registration. No one should be dissuaded from registering to vote because of the fear of identity theft or unwarranted intrusion into their private life.

Therefore, the State Board of Elections provides the following policy for disclosure of voter registration applications pursuant to public information requests.

The following information should be redacted from disclosure before any registration application is released publicly:

1. Maryland Driver's License Number
2. Social Security Number
3. Personal Phone Number
4. Personal Email Address
5. Agency through which the Voter Registered or Updated their Registration

All other information contained in the voter registration application may be disclosed without redaction.

All PSR requests that are countywide or by district requests will be charged \$75 and statewide data requests will be charged \$125. Individual record requests will be charged as a countywide request after 2 hours of data gathering has occurred for a requester that sends multiple requests.
